PROJECT DETAILS

Client name : Ethias, Europe

Project name : Intact

Project Domain : Insurance Domain

Project description :

Insurance is a form of risk management in which an insurer agrees to take the risk of the insured entity against future events, uncertain loss etc. Also, in return for this transfer of risk, the insured person exchanges compensation to the insurance company which is termed as Premium. The purpose of an insurance is to provide protection against the risk of any financial loss. Insurance is a contract between the insurer and the insured person or a Group. Insured person means the person who is covered by the insurance policy or the one who avails the benefit of the policy and the insurer is the insurance company who sells the policies.

Roles And Responsibilities:

- Manages user requirements; provides timely project updates.

- Analyzes codes to find causes of errors and revise programs as needed. Provides feedback for performance appraisals of team members.

- Delivering high availability and performance

- Contributing in all phases of the Software development lifecycle (SDLC) Managing Java and Java EE application development

- Identityfies and evaluates new technologies for implementation.

- Coordination with testing teams to resolve defects.

- knowledge sharing activities with team.

- Agile and scrum activities.
